

Supplementary Table 2 Gonadal phenotype and SSR rate at 180 dah

Treatment	Fish Examined	Testis	Ovotestis	Ovary	Sex Reversal Rate (%)
TR+E2+MT	60	60	0	0	0
MN+E2+MT	60	60	0	0	0
GA+E2+MT	60	60	0	0	0

Note: In the experiment 1, MT was also used to rescue SSR induced by TR+E2, MN+E2 and GA+E2 treatment. The phenotype of fish was determined by gonad histology at 180 dah.
