

Supplementary Figure 1: Average body weight throughout the 4 week, 10 week, 8 day, and bisphosphonate experiments. Body weights (BW; g) monitored throughout the duration of the (A) 4- (n=15/group) and 10-week (n=10/group), (B) 8 day (n=10/group), and (C) bisphosphonate (n=10/group) experiments. Data in figures displayed as mean \pm SEM. Differences in body weight increase from day 0, analysed by 1-way ANOVA with Dunnet's multiple comparison test, * $P < 0.05$ (A, B), or unpaired Student's t-test vs. respective control, $P > 0.05$ (C).
