Figure S3

(A) Fasting insulin levels (ng/ml) for IR\textsuperscript{Ko6} and IRKO\textsuperscript{GIP} with data points for males and females.

(B) Fasting glucose levels (mg/dl) for males and females. The levels are similar between IR\textsuperscript{Ko6} and IRKO\textsuperscript{GIP}.

(C) HOMA IR for males and females, showing no significant difference between IR\textsuperscript{Ko6} and IRKO\textsuperscript{GIP}.
