

Supplemental Figure 5. The effect of isoflurane, oxygen, or neither (baseline) on corticosterone levels in blood (top) and hippocampus (HPC; bottom) at postnatal day (PND) 1, 5, 9, and 13. Within a treatment, ages with different letters are significantly different. Data were analyzed by Two-way Analysis of Variance,  $\alpha=0.05$ . Data are shown as mean  $\pm$  SEM.
